

Reference No. 5.25

## SURVEY OF SELECTED PRIVATE PENSION FUNDS 1972-73

This bulletin contains the results of a survey of separately constituted private pension funds operated by a number of large companies or groups of companies and relates to the year 1972-73.

### Comprehensive Sample Surveys

2. For 1955-56, 1960-61, 1961-62 and 1962-63, the Bureau conducted sample surveys of pension and retiring allowance schemes in private businesses subject to payroll tax, other than in rural industries, private domestic service, and certain businesses such as accountants, trade associations, consultant engineers, etc. Australian Government airlines and banks were included where they had established their own funds separately from the Australian Government superannuation funds, but statutory coal miners' pension funds were excluded. Details were asked for three types of pension and retiring allowance schemes. They were:

- (a) schemes operated through separately constituted funds,
- (b) schemes operated through life insurance offices, and
- (c) direct payments of pensions and retiring allowances.

The results of the 1955-56 survey were published in *Finance Bulletin No. 47, Part I*, and the 1960-61, 1961-62 and 1962-63 survey results were published in *Insurance and Other Private Finance Bulletin No. 2*.

### Small Surveys of Selected Funds

3. For the years 1956-57 to 1958-59, 1963-64 and 1964-65, information was collected from a small number of the larger separately constituted funds. Although only a small number of funds was included in these collections they accounted, in 1962-63, for about 27 per cent of the income, 28 per cent of the expenditure and about 34 per cent of the total assets of the separately constituted funds covered by the more comprehensive sample survey conducted for 1962-63. A complete series was obtained by extracting details for the same funds from the larger surveys in the intervening years and the results for 1955-56 to 1964-65 were published in April 1966.

### Enlarged Surveys of Selected Funds

4. In order to extend the coverage of the published statistics, returns were collected from an additional 160 funds for 1964-65 and these were tabulated with the returns from the 1964-65 survey referred to in paragraph 3 above. The results of this enlarged survey were published in September 1966.

5. The enlarged 1964-65 survey was used as a base for the annual surveys conducted for the years 1965-66 to 1971-72 but during this period coverage was progressively reduced as certain funds ceased to exist. However, the overall effect on the statistics was minimal.

6. In 1972-73 certain of the larger funds amalgamated with funds previously outside the survey, and the scope of the collection was extended to include these additional funds as separate details were not available. The figures contained in this bulletin for the years 1968-69 to 1971-72 have been revised to accord with the increased coverage, and consequently are not comparable with details previously published for the years 1964-65 to 1967-68.

7. The funds included in the 1972-73 survey accounted for about 73 per cent of the total contributions, 72 per cent of the income, 69 per cent of the expenditure and 72 per cent of the assets of the funds covered by the comprehensive sample survey for 1962-63. The 1972-73 survey is not a representative sample and it is not known to what extent its share of the whole field has changed since the 1962-63 survey; nor is the pattern of income, expenditure and asset distribution of the funds included in this survey necessarily representative of the whole field.

8. The statistics do not relate to uniform accounting periods but to the financial years of the funds which ended in the years shown.

9. Any discrepancies between totals and sums of components in tables are due to rounding.
